

I support RM-10352. With the growing popularity of 160 meters, it is important to have some guidelines for the newer users of this band to go by. This will go a long way toward minimizing any possible conflicts due to confusion about "gentlemens agreements".

The vast majority of us want to be able to share our resource and put our priveledges to use in a cooperative manner. By having a consistent band plan structure, I believe we will be able to accomplish this with the minimum confusion.

Thankyou,

Jeff Benson - N8CC
